The new alternative to glass and polypropylene jars

Overview

- Revolutionary PET jar
- Suitable for hot fill applications up to 95°C
- Suitable for pasteurization processes†

Food applications

- Cooking sauces, including ethnic and pasta sauces
- Tomato-based products
- Pesto
- Acidified / pickled vegetables
- Fruit purées, jams and spreads
- Relishes and chutneys

Key benefits

- Up to 85% lighter than glass
- Shatterproof
- Transparent
- Uses regular twist-off metal caps
- Offers substantial logistical cost and carbon footprint savings over glass
