

	ENVIRONMENTAL & SUSTAINABILITY POLICY			
	Site:	Verbania	Date:	26/07/2022
	Approved by:	Regional Director HSE Manager Quality manager	Revision:	2

The company **Plastipak Italia Preforme S.r.l.**, which produces Amorphous Polyethylene Terephthalate, Regraded and PET Preforms, has decided to identify, manage and minimize the environmental impacts that its activities may have on the surrounding environment.

To this end, the company intends to operate using an **Environmental Management System** according to ISO 14001:2015 and ISCC PLUS scheme, in order to preserve **the context of great naturalistic value** within which the company operates and ensure that its products and processes help to **establish an all-round traceable and sustainable circular economy**.

In this regard, the company undertakes to:

- **Respect all the applicable laws and regulations** in force in the environmental field;
- **Communicate** the information necessary to understand **the effects on the environment of the company's activities** to the staff working in the company, pursuing an open and transparent dialogue;
- **Promote the awareness of staff** at all levels regarding the protection of the environment, **by carrying out training and information programs for staff** on environmental issues;
- Preliminary **assessment** of the environmental impacts **of new processes**, with particular attention to **noise and odor emissions**;
- **Reduce its own emissions** of greenhouse gases;
- **Reduce the production of waste**, and **reduce the share of waste destined for landfill disposal**;
- **Pursue continuous improvement**, intended as reducing the impacts of the whole supply chain, e.g., by **sourcing sustainable raw materials**, **reducing its energy consumption** and **promoting a circular design** of its products.
